*Cumulative data (7 June 2016 – 31 August 2017)

EIPP projects (Commission Implementing Decision (EU) 2016/1942, as amended by Decision (EU) 2017/919 of 29 May 2017) must:

- 1. Have a minimum size of EUR 1 million (project total cost)**
- 2. Fall within the geographical scope of Article 8 and the sectors/objectives of Article 9(2) of the EFSI Regulation – (EU) 2015/1017 (MS plus cross-border projects with neighbouring countries)**
- 3. Be compatible with EU and MS law and shall not entail any legal, reputational or national security risks**
- 4. Have started or be expected to start within three years from submission to the Portal**
- 5. Only legal entities (in good standing) established in a Member State (not individuals) can submit projects**
- 6. Be clearly described as investment projects with accurate information provided**

Update: free publication of all projects (public or private)

European Investment Project Portal (EIPP)

The meeting place for project promoters and investors

Update: Log In to EIPP and submit your project for free; minimum project size is now EUR 1 million

Are you a project promoter based in the EU, and want to reach potential investors worldwide? Register your project in the European Investment Project Portal (EIPP) and boost its visibility to a large network of international investors! Start today by submitting your project below.

Or are you an investor looking for investment opportunities in areas such as energy efficiency, transport, healthcare, renewable energy, broadband infrastructure or in financing SMEs? The European Investment Project Portal (EIPP) will offer you a broad choice of viable projects.

INVESTMENT PROJECT EIPP-20160231

New railway connection of the EuroAirport

This project was submitted in the following language: français (fr).

PROJECT DESCRIPTION

Direct access to the airport of Basel-Mulhouse by regional trains. The project is supported by partners, SNCF networks, EuroAirport, Grand East Region and the Federal Transport Office (Switzerland)

The project aims to enable direct access of the Airport of Basel-Mulhouse by regional trains (TER, TER 200 and S-Bahn). It involves the creation of:

1. a new station located directly in front of the terminal;
 2. a railway section of 6 km, a branch line of the existing Strasbourg-Mulhouse-Basel line.
- It is the only trilingual airport in the world, the 3th airport of Switzerland and the 7th of France.

COUNTRY, REGION

France [Grand-Est]
Germany [BADEN-WÜRTTEMBERG]
Switzerland

SECTOR(S)

Trans European Network – Transport

PROJECT STATUS

(Pre)feasibility

START DATE

April 2016

ESTIMATED PROJECT COST

EUR 220 million

ASSET OWNERSHIP

Public

PROJECT TYPE

Other

REVENUE TYPE

Market and balancing subsidies (% to be defined)

ECONOMIC RATIONALE

Direct access by train to Basel-Mulhouse Airport (EuroAirport Basel-Mulhouse-Freiburg) provides the annual airport passengers (7.1 million in 2015) and the employees at the airport (approximately 6 200 at the end of 2015) with an efficient alternative to car travel and shortened travel times compared to current bus travel offers (gaining of about 10 minutes from Basel and around 20 minutes from Mulhouse compared to current public transport). This project is aimed at the 25 000 persons leaving and getting to the EuroAirport daily. This project contributes to the increasing of the attractiveness of the territory, a trilingual space (France-Switzerland-Germany).

The funding agreement for the previous studies and consultations was signed by the partners in April 2016.

Despite a significant investment cost, the advantages of the project in terms of transport quality enable it to display high socio-economic indicators, with an internal rate of return for the community of around 6 % (the return of profits in relation to investment over time).

FINANCING DETAILS

Financing source: Public

The financial package remains to be defined. The project financing arrangements are based on political decisions. At this stage, discussions between the partners have led to the principle of funding, on one hand, by the French State and the authorities concerned and, on the other hand, by the Helvetic Confederation and the Swiss cantons concerned and the Bâle-Mulhouse airport. The Land of Baden-Württemberg and the European Union may also be solicited.

The promoter has applied or has the intention to apply for EU or EIB financing related to this project

EXISTING/POTENTIAL BOTTLENECKS FOR THE REALISATION OF THE PROJECT

n/a

PROJECT ADDITIONAL INFORMATION

In establishing the time frame for the realisation of the project the time needed for studies and consultations, guidance and administrative procedures, namely the forthcoming public investigation, the land acquisition and works shall be taken into account. The time frame planned for the works is 2022-2025.

INVESTMENT PROJECT EIPP-20100041

Interconnector between Estonia and Finland (BalticConnector)

PROJECT DESCRIPTION

Gas transmission system interconnection between Estonia and Finland comprising offshore and onshore pipelines and 2 compressor stations in both member states.

Technical description

- A) Onshore pipeline Inkoo-Suonio, 22 km DN500 (80 bar), in Finland. Metering and compressor station in Finland
- B) Offshore pipeline from Inkoo (FI) to Kersalu (EST), 81 (78) km, bidirectional DN500 (80 bar) subsea pipeline with network injection capacity of 7.2 million m3/day, 0.3 million m3/h
- C) Onshore Pipeline Kõli – Kersalu (Paldiski), 47 (54) km DN700 (54 bar) in Estonia. Metering and compressor station in Estonia. City-Gate in Kõli.

COUNTRY, REGION Finland [Helsinki-Uusimaa] Estonia [Põhja-Eesti]	START DATE December 2020	ESTIMATED PROJECT COST EUR 250 million
SECTOR(S) Gas Infrastructure incl. transmission, distribution, storage and LNG	ASSET OWNERSHIP Public	PROJECT TYPE Greenfield
PROJECT STATUS Structuring	REVENUE TYPE Tariff at the start, regulated afterwards	

[< Previous](#) [Projects list](#) [Next >](#)

ECONOMIC RATIONALE

Enhance the regional security of supply: The Balticconnector gas interconnector physically connects the Finnish and the Baltic Gas infrastructures. In addition, Balticconnector as a part of regional gas investment program gives the Finnish gas market access to the Latvian underground gas storage and Klaipeda LNG terminal and gas from central Europe through the GIPL.

Integrate the regional markets: Balticconnector has a role in the process to connect the Finnish and Baltic gas markets. In order to achieve these objectives, also other gas grid enhancement projects in the region are required (Est-Lat Enhancement).

INVESTMENT PROJECT EIPP-20100052

Hydro Pump Storage Power Plant Pfaffenboden in Molln

PROJECT DESCRIPTION

The hydro pumped storage Pfaffenboden in Molln will have a capacity of 300 MW and generate annually approximately 800 GWh.

The headwater reservoir consists of 4 tunnels based in the ridge of the "Gaisbergschuppe" with a total volume of 1.25 Mio m³ (1.500m length and 16m diameter). The power unit (two turbine sets, each approx. 150 MW) is located in an underground shaft. Therefore the project is especially environmentally friendly and sustainable, as instead of the construction of a dam, the plant comprises a closed-loop water system whose components are largely underground or located on an existing industrial site.

COUNTRY, REGION Austria [Obersterreich]	START DATE April 2014	ESTIMATED PROJECT COST EUR 380 million
SECTOR(S) Electricity Infrastructure incl. transmission, distribution, storage and smart grids	ASSET OWNERSHIP Private	PROJECT TYPE Greenfield
PROJECT STATUS Construction-started	REVENUE TYPE Market-based	

[< Previous](#) [Projects list](#) [Next >](#)

ECONOMIC RATIONALE

Volatile production makes it possible to make lucrative use of storage power plants through sharp intraday price fluctuations and high prices for energy to stabilise the network (in 2014 alone, the market volume of energy to stabilise the network in Austria [control energy] came to EUR 200 million). Pumped storage is the only tried-and-tested, large-scale means of storing and deploying electricity quickly and flexibly. Pumped storage projects are therefore a key partner in the energy transition. The Molln / Pfaffenboden pumped-storage power plant is particularly flexible in terms of its system management, being able to respond quickly to changes in the electricity market. This means that it is possible to trade with all

INVESTMENT PROJECT EIPP-20170254

FloatMast

PROJECT DESCRIPTION

Development of a floating platform with a mast for Wind resource uncertainty reduction of Offshore Wind Power Production (Renewable energy) and sea border surveillance (Civil Protection/Defense).

A stable, multi-purpose and re-usable platform that provides the highest quality of wind data measurements on a floating foundation. Also as a platform it can be used for Radar deployments in the open sea, at any depth and perform sea border and marine space surveillance.

COUNTRY, REGION Greece [Nóio Aiyóli (Noto Aigio)] United Kingdom [Outer London]	START DATE June 2017	ESTIMATED PROJECT COST EUR 5.2 million
SECTOR(S) Renewable Energy Production ICT Infrastructures, including Broadband	ASSET OWNERSHIP Private	PROJECT TYPE Other
PROJECT STATUS Construction-started	REVENUE TYPE Market-based	

[< Previous](#) [Projects list](#) [Next >](#)

ECONOMIC RATIONALE

Investing in an Offshore Wind Park can be of the order of 0.5-1.5 Billion Euros, so it is crucial to downsize the Risk of the investment. FloatMast innovation reduces the uncertainty of the investment's income at one third and provides the highest net economic benefit in relation to competitive solutions. It presents a new technological solution to the industry and it combines the best characteristics of the main two competitive technologies. Depending on the size and wind regime of the OWP, FloatMast can reduce the cost to the Developers by 31.0 to 280.6 m Euros for the full OWP operational life. FloatMast is expected to reach in the next 5 years a market share of 8%-15%, and is expecting to deploy at least 15 platforms until 2021.

Updates & new features

Updates

Amendment of the EIPP Commission Implementing Decision to the following effects:

- 1. Min project size - lowered to EUR 1 million (previously EUR 5 million)**
- 2. Free submission for all projects (public & private) - waiving of the previous EUR 100 submission fee for private promoters**

New features

- 1. Online projects registration – previously via a downloadable PDF form**
- 2. Registration of investors – in addition to project promoters**
- 3. Newsletter and weekly updates of new and updated projects published on the Portal**
- 4. Targeted notifications - tailored to investors' declared interests and preferences**
- 4. Soon partners page (logos)**

E. Benefits for promoters and investors

What can the Portal bring to project promoters?

- 1. Diversify their sources of financing**
- 2. Complement EU funding received (i.e. grants)**
- 3. Offer visibility to project promoters for investors worldwide – particularly on the early phase of project development (e.g. start-ups, angel investment)**
- 4. Help in finding new collaborators and business partners**

What can the Portal bring to investors?

- 1. Offer direct easy access to a broad range of investment projects covering various economic sectors in all EU Member States**
- 2. A transparent and forward-looking pipeline of projects coming from EU-based project promoters**
- 3. Tailored alerts and notifications, based on investors preferences and interests (country, sector, project size, etc.)**

Does my project have to be based in the EU to be published on the Portal?

Yes. However, cross-border projects with non-EU countries are also permitted as long as the investment takes place, at least partially, in one of the EU MS.

Does the Portal provide financing?

The EIPP does not provide financing. It acts as a bridge between EU-based project promoters and investors worldwide.

Is the Portal linked to EFSI?

No, the publication of a project on the Portal is neither a guarantee of, nor a precondition for obtaining EFSI financing.

Is publishing a project on the Portal free of charge?

Yes, publication is free for all projects.

As an investor, do I have to be EU-based?

No. Investors can be based anywhere in the world.
